Introducing the S.H.I.E.L.D. from Elliptical Mobile Solutions!

The S.H.I.E.L.D. is an exclusive patch panel developed by Elliptical Mobile Solutions. It offers a secure means to connect to your equipment without having to access the components themselves.

- Solid steel construction provides a tough physical barrier and EMI attenuation
- Five position locking high-strength, full-length compression door latch
- All connectors are “pass-through” type - no terminations required
- Optional “tamper-proof” multi-tier security with 4000 event audit trail and time sensitive keying

Standard Connector Configuration*

8 IP-67 RJ-45 network connectors - shielded, bonded, PoE (power over Ethernet) ready

4 IP-67 LC fiber-optic duplex connectors – high-bandwidth applications

Unique IP-67 KVM pass-through - no wasted space, outside monitoring keeps environment sealed

Extra 15-pin DIN legacy support

3 IP-67 N-Type RF connectors - transmit, receive, and repeat high energy applications

4 IP-67 USB connectors - high bandwidth COTS applications

4 IP-67 IEEE-1394 firewire/iLink connectors-COTS audio visual applications

Coming soon: IP-68 DVI and HDMI Connectors!

*Custom configurations available
