## **Dot VN, Inc. Signs Memorandum of Understanding (MOU) with Cerelink® to Build Two Internet Data Centers in Vietnam**

SAN DIEGO, CALIFORNIA – April 2, 2007, Dot VN, Inc., a Delaware corporation (“Dot VN” or the “Company”) ([www.DotVN.com](http://www.DotVN.com)), (NQB Pink Sheets: DTVI), an Internet and Telecommunications Company and authorized global domain name registrar ([www.VN](http://www.VN)) for the Country of Vietnam, announced today that the Company has signed a Memorandum of Understanding (the “MOU”) relating to the design and implementation of two Internet Data Centers (“IDCs”) in Vietnam with Cerelink®, a Delaware Corporation (“Cerelink”).

Cerelink® ([www.Cerelink.com](http://www.Cerelink.com)), founded by former Intel® managers in 2004, is a worldwide technical solutions company, which has full time operations in the US and Europe. Cerelink’s corporate mission is to find innovative uses of technology that create positive social impacts. Cerelink® has partnered with educational institutions, governments, healthcare companies, and private businesses to create unique technical solutions that can eventually be replicated throughout the world.

The three phase MOU with Dot VN provides that Cerelink® will assist the Company in forming strategic partnerships to design and build two IDCs which are intended to service foreign businesses located in Vietnam, the Vietnamese government as well as the country’s 85,000,000 citizens. The first IDC will be constructed in the southern center of commerce, Ho Chi Minh City (population: 8,000,000) and the second in Vietnam’s capital, Hanoi (population: 3,500,000). During Phase One, Cerelink® and its corporate partners will travel to Vietnam to survey and evaluate preliminary technical designs and project plans. Following approval of the technical designs and plans, Cerelink® will initiate Phase Two which requires implementation of the finalized technical design and coordination of the construction of the two IDCs. Once operational Dot VN and Cerelink® will enter into Phase Three of the MOU, which contemplates the development and implementation of a “troubleshooting” program and refinement/upgrade of both IDCs by Cerelink®.

This week, Cerelink and its corporate partners will send representatives to Vietnam in connection with the initial phase of the MOU. It is anticipated that each partner will bring to bear their technical expertise, products and services to develop the data center projects into internet and telecommunication hubs which will support and nurture Vietnam’s technological growth.

Richard Draper, CEO of Cerelink® said, “Cerelink and its technology team are excited about helping DOT VN contribute to Viet Nam’s economic development. The country’s surging growth makes it a prime location to deploy innovative technology solutions. Cerelink is especially pleased that DOT VN shares our values around using the latest technology to make a positive difference in people’s lives.”

Thomas Johnson, Chairman and CEO of Dot VN added, “We are very excited to have Cerelink® as our strategic project management partner in designing, building and implementing state-of-the-art IDC facilities and we look forward to launching these two commercial grade data centers in

2007. In the near term, we expect to drive growth by offering wholesale turnkey internet and telecom packages such as real time online domain name registration, web and server hosting, mission critical data recovery solutions, co-location services, shared and dedicated servers, e-commerce, VoIP and ISP services. However, our goal is to create new technological hubs which will not only provide standard data center services but also serve as the foundation for deployment of additional cutting edge products and services. Dot VN anticipates that Cerelink® and its corporate partners will provide us with the latest technology for operating the IDCs, along with new data and telecommunication solutions to power technical development and growth in Vietnam.”

**About the Companies:**

Dot VN, Inc. ([www.DotVN.com](http://www.DotVN.com)) is the online service provider of .VN (Vietnam) domain name registrations globally. The Company has established agreements with the Vietnamese government and international ISP's (Internet service providers) such as VNPT, Netsoft, VDC, FPT, along with Verisign, MarkMonitor.com, NetNames.com, Ascio.com, MelbourneIT.com, RGNAMES.com, EbrandSecure.com, IPMirror.com and over 70 top domain resellers to commercialize Vietnam's Internet and Telecommunications services. Dot VN, Inc. has strived to deliver high value online communication and commerce solutions along with outstanding customer service both domestically and internationally with a focus on Vietnam. The Vietnam Internet Network Information Center (VNNIC) awarded Dot VN, Inc. an “exclusive long term contract” to be the first registrar to promote, market and register its country code Top Level Domain (ccTLD) of .VN (Vietnam) via the Internet. Dot VN, Inc. is developing an Internet based distribution network through which the Company delivers business applications and services and digital software content to a network of more than 70 Service Providers in over 30 countries. The Company is developing the latest Internet domain registration software technologies for marketing, sales and managing the .VN domain name registration, website design and hosting, email systems, e-commerce and e-marketing, Vietnamese Search Engine for .VN and VOIP telecommunications for Vietnam and other customers worldwide.

Cerelink® ([www.Cerelink.com](http://www.Cerelink.com)) is a worldwide technical solutions company founded by former Intel® managers in 2004. Cerelink® has full time operations in the US and Europe. Cerelink's corporate mission is to find innovative uses of technology that create positive social impacts. We partner with educational institutions, governments, healthcare companies, and private businesses to create unique technical solutions that can eventually be replicated throughout the world. Our technical team has successfully completed several projects that have included implementing the first wireless broadband school in Costa Rica and the first wireless broadband hospital in Italy. Some of our current contracts include the creation of a city-wide wireless (WiFi/WiMax) telecommunications infrastructure providing voice and data services in Kampala, Uganda and the implementation of a high-tech sports arena in New Mexico.

**Cautionary Warning Regarding Forward-Looking Statements:**

This press release may contain "forward-looking statements." In some cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "could," "expects," "plans," "intends," "anticipates," "believes," "estimates," "predicts," "potential" or "continue" or the negative of such terms and other comparable terminology. These forward-looking statements include, without limitation, statements about our market opportunity, our strategies, competition, expected activities and expenditures as we pursue our business plan, and the adequacy of our available cash resources. Although we believe that the expectations reflected in any forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Actual results may differ materially from the predictions discussed in these forward-looking statements and the statements contained herein reflect the Company's views as of April 2, 2007. Changes in the circumstances upon which we base our predictions and/or forward-looking statements could materially affect our actual results. Additional factors that could materially affect these forward-looking statements and/or predictions include, among other things: (1) our limited operating history; (2) our ability to pay down existing debt; (3) our ability to attract and retain key executive officers and the professional advisors necessary to guide us through our corporate restructuring;

(4) unforeseen costs and expenses; (5) potential litigation with our shareholders, creditors and/or former or current investors; (6) the Company's ability to comply with federal, state and local government regulations; (7) the Company's ability to maintain current agreements with the Country of Vietnam and secure additional agreements; and (8) other factors over which we have little or no control.
